Trinity and Beyond: The Atomic Bomb Movie (1992)

\$16.99 BUY

*** OVERVIEW**

You may want to "RUN, DUCK, and COVER" after watching this incredible doc!

A chronicle of the top secret, strange, and visually shocking history of the design, production, and testing of atomic and hydrogen bombs by the United States. Renowned special effects filmmaker Peter Kuran (Star Wars, Star Trek II and V, Robocop,) dedicated more than three years to the production of this amazing film. He traveled far and wide to obtain startling footage of nuclear bomb tests conducted by Great Britain and China, and the largest ever atomic bomb test explosion in Russia.

The quality of the images is remarkable and required the development of a new film restoration system. Some images show a stark and shocking beauty as superheated gases and fallout expand into the atmosphere. Another unsettling segment shows a mannequin "Ozzie and Harriet" family in their home—right before they are completely incinerated in a test to determine the effects of nuclear warfare on civilians.

*** FEATURES**

Type: video and DVD documentary
 Ages: 14 and up
 List Price: \$19.95
 Street Price: \$16.99
